Index of Subjects

Acetate clearance rate
Acetate clearance rate as a potential index of the availability of glucogenic precursors in ruminants fed on roughage-based diets. **66**, 301, 1991

Adenosylmethionine
Influence of different sources of injected selenium on certain enzymes, glutathione and adenosylmethionine concentration in buffalo (*Bubalus bubalis*) calves. **66**, 261, 1991

L-Alanine
Effects on mesenteric vein L-alanine infusion on liver metabolism in beef heifers fed on diets differing in forage:concentrate ratio. **66**, 437, 1991

Anthropometry
Anthropometric and dietary survey of the elderly Chinese. **66**, 355, 1991

Anti-progestin
Reduction of the intake of food and water is responsible for reduction of litter growth when dams are treated with a progesterone antagonist. **66**, 17, 1991

Beef
Transport of feed selenium to different tissues of bulls. **66**, 49, 1991

Bile acids
Biodynamics of cholesterol and bile acids in the lithiasic hamster. **66**, 479, 1991

Bioavailability
Intrinsic labelling of different foods with stable isotope of zinc (^{67}Zn) for use in bioavailability studies. **66**, 57, 1991

Blood pressure
Sodium, potassium and chloride utilization by rats given various inorganic anions. **66**, 523, 1991

Bone
Effect of dietary lactose on salt-mediated changes in mineral metabolism and bone composition in the rat. **66**, 73, 1991

Bovine liver
Transport of feed selenium to different tissues of bulls. **66**, 49, 1991

Calcium
Effect of dietary lactose on salt-mediated changes in mineral metabolism and bone composition in the rat. **66**, 73, 1991
The effects of dietary levels of inorganic phosphorus, calcium and cholecalciferol on the digestibility of phytate-P by the chick. **66**, 251, 1991

Carbohydrate metabolism
Blood glucose, plasma insulin and sensory responses to guar-containing wheat breads: effects of molecular weight and particle size of guar gum. **66**, 363, 1991

Carcass manipulation
Nutritional and endocrinological manipulation of lean deposition in forage-fed steers. **66**, 171, 1991

Cassava diet
Digestibility of a nutritionally-balanced cassava (*Manihot esculenta* Crantz) diet and its effect on growth in young male dogs. **66**, 199, 1991

Cat nutrition
The effect of dietary taurine content on the plasma taurine concentration of the cat. **66**, 227, 1991

Children
Nutritional status and food consumption in 10–11 year old Dutch boys (Dutch Nutrition Surveillance System). **66**, 161, 1991

Chloride
Sodium, potassium and chloride utilization by rats given various inorganic anions. **66**, 523, 1991

Cholecalciferol
The effects of dietary levels of inorganic phosphorus, calcium and cholecalciferol on the digestibility of phytate-P by the chick. **66**, 251, 1991

Cholesterol
Nutritional status and food consumption in 10–11 year old Dutch boys (Dutch Nutrition Surveillance System). **66**, 161, 1991
Metabolic effects of coconut, safflower, or menhaden oil feeding in lean and obese Zucker rats. **66**, 285, 1991
Biodynamics of cholesterol and bile acids in the lithiasic hamster. **66**, 479, 1991

Computer program
A computerized diet questionnaire for use in diet health education. 1. Development and validation. **66**, 3, 1991

Corticosterone metabolism
The effects of fasting on plasma corticosterone kinetics in rats. **66**, 117, 1991

Cottonseed flour
Effect of refeeding diets containing cottonseed flour with traces of gossypol on rat liver and testis. **66**, 269, 1991

Diet questionnaire
A computerized diet questionnaire for use in diet health education. 1. Development and validation. **66**, 3, 1991

Dietary fibre
Nutrient digestibilities in ingredients fed alone or in combinations. **66**, 27, 1991
Blood glucose, plasma insulin and sensory responses to guar-containing wheat breads: effects of molecular weight and particle size of guar gum. **66**, 363, 1991

Dietary fibre supplement
Plantago ovata seeds as dietary fibre supplement: physiological and metabolic effects in rats. **66**, 331, 1991

Dietary Survey
Anthropometric and dietary survey of the elderly Chinese. **66**, 355, 1991

Dietary taurine
The effect of dietary taurine content on the plasma taurine concentration of the cat. **66**, 227, 1991
Digesta kinetics
Rumen fill and digesta kinetics in lactating Friesian cows given two levels of concentrates with two types of grass silage *ad lib*. **66**, 381, 1991
Digestibility
Digestibility of a nutritionally-balanced cassava (*Manihot esculenta* Crantz) diet and its effect on growth in young male dogs. **66**, 199, 1991
Passage and digestibility of lucerne hay in Japanese sika deer (*Cervus nippon*) and sheep under restricted feeding. **66**, 399, 1991
Digestible energy values
Measurement and prediction of digestible energy values in feedstuffs for the herbivorous fish tilapia (*Oreochromis niloticus* Linn.). **66**, 37, 1991
Digestion
Nutritional implications of D-xylose in pigs. **66**, 83, 1991
Digestive enzymes
The effect of concentration of tannin-rich bean hulls (*Vicia faba* L.) on activities of lipase (*EC* 3.1.1.3) and α-amylase (*EC* 3.2.1.1) in digesta and pancreas and on the digestion of lipid and starch by young chicks. **66**, 139, 1991
Edible offal
Transport of feed selenium to different tissues of bulls. **66**, 49, 1991
Editorial
Arguments for acceptance. **66**, 1, 1991
Reflections on an editorial year. **66**, 149, 1991
Oral scientific tradition. **66**, 353, 1991
Elderly Chinese
Anthropometric and dietary survey of the elderly Chinese. **66**, 355, 1991
Energy
Nutrient digestibilities in ingredients fed alone or in combinations. **66**, 27, 1991
Entero-insular axis
The effect of energy source and feeding level on the hormones of the entero-insular axis and plasma glucose in the growing pig. **66**, 187, 1991
Essential minerals
Contents of essential and toxic mineral elements in Swedish market-basket diets in 1987. **66**, 151, 1991
Excretion
Nutritional implications of D-xylose in pigs. **66**, 83, 1991
Fasting
Does the glycogen synthase (*EC* 2.4.1.21) of brown adipose tissue play a regulatory role in glucose homeostasis? **66**, 95, 1991
The effects of fasting on plasma corticosterone kinetics in rats. **66**, 117, 1991
Fatty acid absorption
Intestinal absorption of linoleic acid in experimental renal failure. **66**, 467, 1991
Fermented milk
Short-term effect of whole milk and milk fermented by *Pseudomonas fluorescens* on plasma lipids in adult boars. **66**, 129, 1991
Food passage
Passage and digestibility of lucerne hay in Japanese sika deer (*Cervus nippon*) and sheep under restricted feeding. **66**, 399, 1991
Gallstones
Biodynamics of cholesterol and bile acids in the lithiasic hamster. **66**, 479, 1991
Gluconeogenesis
Acetate clearance rate as a potential index of the availability of glucogenic precursors in ruminants fed on roughage-based diets. **66**, 301, 1991
Glucose
Metabolic effects of coconut, safflower, or menhaden oil feeding in lean and obese Zucker rats. **66**, 285, 1991
Glutathione peroxidase
Influence of different sources of injected selenium on certain enzymes, glutathione and adenosylmethionine concentration in buffalo (*Bubalus bubalis*) calves. **66**, 261, 1991
Glycogen synthase
Does the glycogen synthase (*EC* 2.4.1.21) of brown adipose tissue play a regulatory role in glucose homeostasis? **66**, 95, 1991
Gossypol
Effect of refeeding diets containing cottonseed flour with traces of gossypol on rat liver and testis. **66**, 269, 1991
Growth
Effects of magnesium and zinc deficiencies on growth and protein synthesis in skeletal muscle and the heart. **66**, 493, 1991
Role of insulin-like growth factor-1 and growth hormone in growth inhibition induced by magnesium and zinc deficiencies. **66**, 505, 1991
Growth hormone
Role of insulin-like growth factor-1 and growth hormone in growth inhibition induced by magnesium and zinc deficiencies. **66**, 505, 1991
Guar gum
Blood glucose, plasma insulin and sensory responses to guar-containing wheat breads: effects of molecular weight and particle size of guar gum. **66**, 363, 1991
Health education
A computerized diet questionnaire for use in diet health education. 1. Development and validation. **66**, 3, 1991
High-carbohydrate diet
Does the glycogen synthase (*EC* 2.4.1.21) of brown adipose tissue play a regulatory role in glucose homeostasis? **66**, 95, 1991
High-fat diet
Does the glycogen synthase (*EC* 2.4.1.21) of brown adipose tissue play a regulatory role in glucose homeostasis? **66**, 95, 1991
High-fat diets
The effect of energy source and feeding level on the hormones of the entero-insular axis and plasma glucose in the growing pig. **66**, 187, 1991
IGF-binding protein
Effect of protein deprivation on insulin-like growth factor-binding proteins in rats. **66**, 105, 1991

Insulin
Metabolic effects of coconut, safflower, or menhaden oil feeding in lean and obese Zucker rats. **66**, 285, 1991
Effect of dietary tryptophan on muscle, liver and whole-body protein synthesis in weaned piglets: relationship to plasma insulin. **66**, 423, 1991
Insulin-like growth factor 1
Effect of protein deprivation on insulin-like growth factor-binding proteins in rats. **66**, 105, 1991
Role of insulin-like growth factor-1 and growth hormone in growth inhibition induced by magnesium and zinc deficiencies. **66**, 505, 1991
Intestinal transport
Intestinal absorption of linoleic acid in experimental renal failure. **66**, 467, 1991
Intrinsic and extrinsic labelling
Apparent zinc absorption by rats from foods labelled intrinsically and extrinsically with ^{67}Zn. **66**, 65, 1991
Intrinsically-labelled foods
Intrinsic labelling of different foods with stable isotope of zinc (^{67}Zn) for use in bioavailability studies. **66**, 57, 1991
Iron
Nutritional status and food consumption in 10–11 year old Dutch boys (Dutch Nutrition Surveillance System). **66**, 161, 1991
Kinetics
Urease (*EC* 3.5.1.5) inhibition in the sheep rumen and its effect on urea and nitrogen metabolism. **66**, 209, 1991
Lactation
Reduction of the intake of food and water is responsible for reduction of litter growth when dams are treated with a progesterone antagonist. **66**, 17, 1991
Tissue protein synthesis in lactating and dry goats. **66**, 451, 1991
Lactose
Effect of dietary lactose on salt-mediated changes in mineral metabolism and bone composition in the rat. **66**, 73, 1991
Large bowel fermentation
Large bowel fermentation in rats eating processed potatoes. **66**, 313, 1991
Letters to the Editors **66**, 351, 1991
Lithiasis
Biodynamics of cholesterol and bile acids in the lithiasic hamster. **66**, 479, 1991
Litter growth
Reduction of the intake of food and water is responsible for reduction of litter growth when dams are treated with a progesterone antagonist. **66**, 17, 1991
Liver
Effect of refeeding diets containing cottonseed flour with traces of gossypol on rat liver and testis. **66**, 269, 1991
Effects on mesenteric vein L-alanine infusion on liver metabolism in beef heifers fed on diets differing in forage:concentrate ratio. **66**, 437, 1991
Magnesium deficiency
Effects of magnesium and zinc deficiencies on growth and protein synthesis in skeletal muscle and the heart. **66**, 493, 1991
Role of insulin-like growth factor-1 and growth hormone in growth inhibition induced by magnesium and zinc deficiencies. **66**, 505, 1991
Market-basket diets
Contents of essential and toxic mineral elements in Swedish market-basket diets in 1987. **66**, 151, 1991
Metabolic pathways
A new approach to the quantitative estimation of nitrogen metabolic pathways in the rumen. **66**, 407, 1991
Mifepristone
Reduction of the intake of food and water is responsible for reduction of litter growth when dams are treated with a progesterone antagonist. **66**, 17, 1991
Muscle composition
Nutritional and endocrinological manipulation of lean deposition in forage-fed steers. **66**, 171, 1991
Neutral-detergent fibre
Measurement and prediction of digestible energy values in feedstuffs for the herbivorous fish tilapia (*Oreochromis niloticus* Linn.). **66**, 37, 1991
Nitrogen
A new approach to the quantitative estimation of nitrogen metabolic pathways in the rumen. **66**, 407, 1991
Nutrient digestion
The effect of concentration of tannin-rich bean hulls (*Vicia faba* L.) on activities of lipase (*EC* 3.1.1.3) and α-amylase (*EC* 3.2.1.1) in digesta and pancreas and on the digestion of lipid and starch by young chicks. **66**, 139, 1991
Nutrition surveillance
Nutritional status and food consumption in 10–11 year old Dutch boys (Dutch Nutrition Surveillance System). **66**, 161, 1991
Nutritional response
Nutritional response of growing rats to faba beans (*Vicia faba* L., minor) and faba bean fractions. **66**, 533, 1991
Onapristone
Reduction of the intake of food and water is responsible for reduction of litter growth when dams are treated with a progesterone antagonist. **66**, 17, 1991
Ostertagia circumcincta
Nitrogen transactions along the digestive tract of lambs concurrently infected with *Trichostrongylus colubriformis* and *Ostertagia circumcincta*. **66**, 237, 1991
Phenylalanine flux
Tissue protein synthesis in lactating and dry goats. **66**, 451, 1991
Phosphorus
The effects of dietary levels of inorganic phosphorus, calcium and cholecalciferol on the digestibility of phytate-P by the chick. **66**, 251, 1991

Phytate
The effects of dietary levels of inorganic phosphorus, calcium and cholecalciferol on the digestibility of phytate-P by the chick. **66**, 251, 1991
Plantago ovata
Plantago ovata seeds as dietary fibre supplement: physiological and metabolic effects in rats. **66**, 331, 1991
Plasma cholesterol
Short-term effect of whole milk and milk fermented by *Pseudomonas fluorescens* on plasma lipids in adult boars. **66**, 129, 1991
Plasma lipids
Short-term effect of whole milk and milk fermented by *Pseudomonas fluorescens* on plasma lipids in adult boars. **66**, 129, 1991
Plasma taurine
The effect of dietary taurine content on the plasma taurine concentration of the cat. **66**, 227, 1991
Potassium
Sodium, potassium and chloride utilization by rats given various inorganic anions. **66**, 523, 1991
Potato processing
Large bowel fermentation in rats eating processed potatoes. **66**, 313, 1991
Protein
Nutrient digestibilities in ingredients fed alone or in combinations. **66**, 27, 1991
Protein absorption
Nitrogen transactions along the digestive tract of lambs concurrently infected with *Trichostrongylus colubriformis* and *Ostertagia circumcincta*. **66**, 237, 1991
Protein deprivation
Effect of protein deprivation on insulin-like growth factor-binding proteins in rats. **66**, 105, 1991
Protein synthesis
Effect of dietary tryptophan on muscle, liver and whole-body protein synthesis in weaned piglets: relationship to plasma insulin. **66**, 423, 1991
Tissue protein synthesis in lactating and dry goats. **66**, 451, 1991
Effects of magnesium and zinc deficiencies on growth and protein synthesis in skeletal muscle and the heart. **66**, 493, 1991
Protein turnover
Nutritional and endocrinological manipulation of lean deposition in forage-fed steers. **66**, 171, 1991
Renal failure
Intestinal absorption of linoleic acid in experimental renal failure. **66**, 467, 1991
Restricted feeding
Passage and digestibility of lucerne hay in Japanese sika deer (*Cervus nippon*) and sheep under restricted feeding. **66**, 399, 1991
Rumen
A new approach to the quantitative estimation of nitrogen metabolic pathways in the rumen. **66**, 407, 1991
Rumen fill
Rumen fill and digesta kinetics in lactating Friesian cows given two levels of concentrates with two types of grass silage *ad lib*. **66**, 381, 1991
Ruminant
Urease (*EC* 3.5.1.5) inhibition in the sheep rumen and its effect on urea and nitrogen metabolism. **66**, 209, 1991
Acetate clearance rate as a potential index of the availability of glucogenic precursors in ruminants fed on roughage-based diets. **66**, 301, 1991
Salt
Effect of dietary lactose on salt-mediated changes in mineral metabolism and bone composition in the rat. **66**, 73, 1991
Se content in tissues
Transport of feed selenium to different tissues of bulls. **66**, 49, 1991
Se supplementation
Transport of feed selenium to different tissues of bulls. **66**, 49, 1991
Selenium
Influence of different sources of injected selenium on certain enzymes, glutathione and adenosylmethionine concentration in buffalo (*Bubalus bubalis*) calves. **66**, 261, 1991
Sensory analysis
Blood glucose, plasma insulin and sensory responses to guar-containing wheat breads: effects of molecular weight and particle size of guar gum. **66**, 363, 1991
Sodium
Sodium, potassium and chloride utilization by rats given various inorganic anions. **66**, 523, 1991
Stable Zn isotopes
Apparent zinc absorption by rats from foods labelled intrinsically and extrinsically with ^{67}Zn. **66**, 65, 1991
Starch
Nutrient digestibilities in ingredients fed alone or in combinations. **66**, 27, 1991
Starch digestion
Large bowel fermentation in rats eating processed potatoes. **66**, 313, 1991
Swedish diet
Contents of essential and toxic mineral elements in Swedish market-basket diets in 1987. **66**, 151, 1991
Tannins
The effect of concentration of tannin-rich bean hulls (*Vicia faba* L.) on activities of lipase (*EC* 3.1.1.3) and α-amylase (*EC* 3.2.1.1) in digesta and pancreas and on the digestion of lipid and starch by young chicks. **66**, 139, 1991
Testes
Effect of refeeding diets containing cottonseed flour with traces of gossypol on rat liver and testis. **66**, 269, 1991
Toxic minerals
Contents of essential and toxic mineral elements in Swedish market-basket diets in 1987. **66**, 151, 1991
Triacylglycerol
Metabolic effects of coconut, safflower, or menhaden oil feeding in lean and obese Zucker rats. **66**, 285, 1991
Trichostrongylus colubriformis
Nitrogen transactions along the digestive tract of

lambs concurrently infected with *Trichostrongylus colubriformis* and *Ostertagia circumcincta*. **66**, 237, 1991

Tryptophan
Effect of dietary tryptophan on muscle, liver and whole-body protein synthesis in weaned piglets: relationship to plasma insulin. **66**, 423, 1991

Urea
Urease (*EC* 3.5.1.5) inhibition in the sheep rumen and its effect on urea and nitrogen metabolism. **66**, 209, 1991

Urease
Urease (*EC* 3.5.1.5) inhibition in the sheep rumen and its effect on urea and nitrogen metabolism. **66**, 209, 1991

Validation
A computerized diet questionnaire for use in diet health education. 1. Development and validation. **66**, 3, 1991

Vicia faba
Nutritional response of growing rats to faba beans (*Vicia faba* L., minor) and faba bean fractions. **66**, 533, 1991

Vitamins
Nutritional status and food consumption in 10–11 year old Dutch boys (Dutch Nutrition Surveillance System). **66**, 161, 1991

Voluntary intake
Rumen fill and digesta kinetics in lactating Friesian cows given two levels of concentrates with two types of grass silage *ad lib*. **66**, 381, 1991

Whole milk
Short-term effect of whole milk and milk fermented by *Pseudomonas fluorescens* on plasma lipids in adult boars. **66**, 129, 1991

D-Xylose
Nutritional implications of D-xylose in pigs. **66**, 83, 1991

Zinc deficiency
Effects of magnesium and zinc deficiencies on growth and protein synthesis in skeletal muscle and the heart. **66**, 493, 1991
Role of insulin-like growth factor-1 and growth hormone in growth inhibition induced by magnesium and zinc deficiencies. **66**, 505, 1991

Zn
Intrinsic labelling of different foods with stable isotope of zinc (^{67}Zn) for use in bioavailability studies. **66**, 57, 1991

Zn absorption
Apparent zinc absorption by rats from foods labelled intrinsically and extrinsically with ^{67}Zn. **66**, 65, 1991

Zn bioavailability
Apparent zinc absorption by rats from foods labelled intrinsically and extrinsically with ^{67}Zn. **66**, 65, 1991
